

MATH SPECTRA REPORT (2024-25)

OBJECTIVE: It is a platform designed to help our students discover the fun and fascinating side of MATHEMATICS. Its a chance to explore,challenge themselves and enjoy the joy of learning.

GRADES:3, 4 & 5

EVENTS:

NUMBER NINJAS:

It is a series of math-based challenges, such as mental math, pattern recognition, and problem-solving by collaborating with teammates to solve math problems and navigating through a challenging course filled with math problems, puzzles, and brain teasers.

CLAY MODELLING

Clay modeling is a fantastic way to explore mathematical concepts in a hands-on interactive manner. It improves cognitive, emotional and social development. Students created clay models of various 3D shapes, fraction representation such as $\frac{1}{2}$, $\frac{1}{3}$ patterns using different shapes and counters to demonstrate basic addition and subtraction.

POSTER MAKING

Poster making is a fun and interactive way to learn and showcase mathematical concepts. By combining art and math, students can create visually appealing posters that demonstrate their understanding of mathematical ideas.

Topic: Real world applications of mathematics

PUZZLERS PARADISE

- Math Puzzles
- Math Crosswords
- Sudoku
